RETAIL CAPACITY METHODOLOGY......2

# 1. INTRODUCTION

- 1.1 GVA was jointly appointed by High Peak and Staffordshire Moorlands Councils in June 2013 to prepare a quantitative retail study to establish current and future need for new retail floorspace to inform respective emerging Local Plans. The final study was published in October 2013.
- 1.2 Subsequent to the publication of the retail study, there have been a number of significant changes in baseline data which has prompted a requirement to update the quantitative capacity modelling exercise so as to provide the respective Councils with a robust evidence base. The main changes which inform this addendum report are as follows:
  - Experian Retail Planner (Briefing Note 11) was published in late October 2013 and provides new growth projections (per capita, non-store trading<sup>1</sup> and sales (floorspace) efficiencies)).
  - Experian Retail Planner (Micromarketer) database was updated to provide access to new population and expenditure (per capita) estimates based on the 2011 Census<sup>2</sup> and the latest Living Costs and Food Survey.
  - **Buxton STEAM Tourist Report** is available to quantify inflow expenditure from visitors to the town.
  - Foodstore Commitment; a proposal for a new out-of-centre Aldi foodstore in Chapel-en-le-Frith<sup>3</sup> (1,589 m<sup>2</sup> gross; 1,140 m<sup>2</sup> net sales) was approved in November 2013.
- 1.3 The respective updates have been made to the capacity modelling tables which are reprovided alongside this report (Appendices 1 3); the tables replace the 2013 Study. The next section sets out the changes in methodology arising from the new Experian data and the Buxton STEAM Tourist Report.

# 2. RETAIL CAPACITY METHODOLOGY

- 2.1 The quantitative assessment adopts a conventional step-by-step methodology, drawing upon the results of the household telephone survey to understand existing shopping patterns and to model existing flows of available expenditure to the main retail destinations within the respective Council areas and the wider sub-region.
- 2.2 The latest methodology, data inputs and assumptions adopted in this update exercise are set out below so as to highlight the differences with the 2013 Study which was based on economic projections derived from Experian Retail Planner Briefing Note 10.1 (September 2012) and 2001 Census data.
- 2.3 It should be noted at the outset that there is no change in the market share figures utilised in the 2013 Study; the figures have been 'rolled' forward and applied against the latest population and expenditure figures detailed below so as to provide an up-to-date position on performance and thereafter need.

# **POPULATION**

2.4 The population estimates and forecasts are derived from the *Experian Micromarketer* database. Whereas the 2013 Study was based on trend-line projections from the 2001 Census results, the new Experian database is based on the 2011 Census results.

2.5 The results show that has been notable changes between the baseline Experian population projections based on the 2001 and 2011 Census results.

# STRATEGIC HOUSING GROWTH

- 2.6 A Strategic Housing Market Assessment (SHMA) is being completed as part of the emerging Local Plan evidence base. Whilst ordinarily the emerging evidence base should seek to adopt a common ('aligned') population source, Experian (ONS trend-line) projections have been utilised given that there is a fundamental difference in the geographical extent of the catchment areas defined for the respective exercises.
- 2.7 The use of postcode specific catchment zones within the retail study exercise is not replicated by the derivation of 'sub' local authority areas in the SHMA. Therefore, the robustness of seeking to align the respective evidence bases would be questionable.
- 2.8 The SHMA projections are currently being updated to reflect recent changes to the methodology. Therefore, on the basis of the above, the Experian projections are an appropriate baseline to underpin the quantitative retail assessment.

# RESIDENT STUDENT POPULATION

2.9 The Experian Household and Population Estimates Data Profile Briefing Note, recently been published to accompany the new Retail Planner database<sup>4</sup>, confirms that students and school children in full-time education studying away from the family home are fully enumerated as resident at their term-time address; students are not 'counted' at their vacation (e.g. parents home) address. On this basis no additional uplift in population has been modelled as part of the update exercise.

# **EXPENDITURE**

2.10 The latest *Experian Micromarketer* data (Briefing Note 11, October 2013) was used to provide estimates of per capita (person) expenditure on convenience and comparison goods in 2012 prices. The differences against the 2013 Study are summarised below.

<sup>&</sup>lt;sup>4</sup> Appendix 1 - Definitions

# PER CAPITA EXPENDITURE

2.11 The latest *Experian Micromarketer* data is based on the latest Living Costs and Food Survey. The subsequent change in per capita expenditure figures between the respective study exercises is therefore summarised below.

ZONE 11 - CHEADLE OUTER	£1,993	£2,147	£3,049	£2,970

2.12 The results show that on the whole, expenditure per capita on both convenience and comparison goods have increased in the latest Experian projections. However, the difference in convenience goods is more pronounced than for comparison goods.

# **GROWTH PROJECTIONS**

2.13 The latest *Experian Micromarketer* data (Briefing Note 11, October 2013) was used to provide estimates of per capita (person) expenditure on convenience and comparison goods in 2012 prices. The difference in expenditure growth projections

		2013-2018	2018-2023	2023-2031
2013 STUDY (EXPERIAN 10.1)	CONVENIENCE	0.5% p.a.	0.8% p.a.	0.8% p.a.

(EXI ERIMIN 11)	COMPARISON	2.8% p.a.	3.0% p.a.	2.9% p.a.

2.14 As the table shows, there are negligible changes in projections for both convenience and comparison goods over the emerging Local Plan period.

# SPECIAL FORMS OF TRADING (SFTs)

2.15 The latest Experian projections of special forms of trading (e.g. expenditure not available to spend in the shops - primarily internet sales<sup>5</sup>) reflect a significant increase on the 2013 Study figures, as follows:

		2013	2018	2023	2031
2013 STUDY	CONVENIENCE	2.3%	3.4%	4.2%	4.8%
(EXPERIAN 10.1)	COMPARISON	10.7%	12.9%	15.6%	16.1%
2014 ADDENDUM	CONVENIENCE	2.5%	3.8%	4.8%	5.4%
(EXPERIAN 11)	COMPARISON	10.8%	14.5%	15.9%	15.9%

- 2.16 In comparative terms, there are only minor projected increases in recommended deductions for Special Forms of Trading (SFTs) for convenience goods over the emerging plan period; this is in part due to current logistical difficulties in servicing customer demand online (main retailers require physical space for 'click and collect' and can only grow home delivery through opening new physical space such as 'dark' stores').
- 2.17 There are however more substantive deductions projected for comparison goods which reflect the longstanding trend for less expenditure to be physically available to spend in traditional centres / stores; this poses significant challenges to traditional 'bricks and mortar' retailing and town centres as a whole. Experian (Briefing Note 11) do however anticipate that internet sales growth will reduce in the longer term as much of the rapid expansion of internet market share has been drive by easily transferable sales items such

\_

<sup>&</sup>lt;sup>5</sup> Experian define SFTs as expenditure that does not take place in shops, such as that via mail order houses, door to door salesmen and stalls and markets. It also includes spending using digital TV and over the Internet.

<sup>&</sup>lt;sup>6</sup> Dark Stores are large warehouses with interiors laid out like supermarkets so staff can walk around to compile orders (Class B8 warehouse and distribution use rather than Class A1 retail). They are not open to the general public.

as music, video and e-books. The market is beginning to mature and this will ultimately lead to slower sales growth in this sector.

# SALES DENSITY IMPROVEMENTS

2.18 Experian (Retail Planner Briefing Note 11) currently anticipates that the scope for density increases for convenience goods is very limited in the medium term due to lower projected increases in sales and slower floorspace growth (e.g. reduction in new build and replacement of older inefficient space). The projections for comparison goods are significantly below historic levels due to the continuing trend towards modern, higher density stores and the demolition of older inefficient space.

		2013-2018	2018-2023	2023-2031
2013 STUDY (EXPERIAN 10.1)	CONVENIENCE	0.1% p.a.	0.2% p.a.	0.2% p.a.
(EXPERIMENTO.1)	COMPARISON	2.1% p.a.	1.8% p.a.	1.8% p.a.
2014 ADDENDUM (EXPERIAN 11)	CONVENIENCE	0% p.a.	0% p.a.	0% p.a.
(EXI ENAN TI)	COMPARISON	2.1% p.a.	2.0% p.a.	2.0% p.a.

2.19 There are extremely limited changes in projections. The most notable change is that Experian now project that the performance of existing convenience floorspace will not grow as anticipated in previous projections. GVA has therefore adopted a 'no growth' scenario for convenience sales densities.

# **AVAILABLE EXPENDITURE**

2.20 On the basis of the changes in data inputs set out above, the overall expenditure pot which underpins the updated needs assessment is as follows:

# **CONVENIENCE GOODS**

		2013 STUDY		20	14 ADDENDU	JM		DIFFERENCE

2.21 It is clear from the comparative analysis that convenience expenditure capacity in the majority of catchment zones within the study area is projected to increase over the emerging plan period. The notable exception is the Leek catchment (survey zone 7); this is attributable to the associated decrease in expenditure per capita (based on lower spend in the latest Living Costs and Food Survey which informs Experian projections).

2.22 The table shows that aside from substantive growth in the High Peak Central and Leek North catchment zones (primarily attributable to increased spend per capita), overall expenditure capacity is either marginally above or below the original 2013 Study projections. The changes in capacity are primarily due to population changes and increasing deductions for non-store (SFT) trading.

# **TOURIST INFLOW**

- 2.23 The total turnover of retail facilities in a particular settlement comprises expenditure from local (study area) residents plus expenditure from other sources such as tourists; Buxton is a particularly popular tourist destination.
- 2.24 Subsequent to preparation of the 2013 Study, a 2012 Buxton STEAM report<sup>7</sup>, which quantifies the local economic impact of tourism, has become available and therefore has been utilised to estimate the quantum of (inflow) expenditure that is spent in local shops within the town by tourists (either day visitors or stay overs).
- 2.25 The STEAM report sets out the following estimates of tourist expenditure on shopping and food & drink goods in the Buxton area in 2012 (Table 10, Appendix 2c):

	2013	2018	2031
FOOD & DRINK	£12.24m	£12.16m	£13.82m
SHOPPING	£14.75m	£15.1m	£16.8m

- 2.26 In order that this total expenditure can be used as an input into the estimates of convenience and comparison floorspace capacity, the following is relevant:
  - GROWTH PROJECTIONS; tourist expenditure is projected forward in accordance with residential expenditure growth rates.
  - APPORTIONMENT OF EXPENDITURE; the STEAM report identifies expenditure on a
    centre rather than individual shop basis; there is consequently no fine grain analysis of
    where the tourist expenditure is physically spent. Consequently, the relevant
    expenditure figures identified are applied on an overall centre basis (i.e. town centre,
    edge and out-of-centre provision combined).

<sup>&</sup>lt;sup>7</sup> Scarborough Tourism Economic Activity Monitor

- DEFINITIONS OF VISITOR; STEAM defines visitors on the following basis:
  - Day Visitors; those visiting from a home location of not less than 3 hours outside of normal resident address; those by persons residing within the district making day visits within that district; and leisure day visits by those staying for a minimum of three hours without spending the night away from normal residence.
  - **Staying Visitors**; those staying in serviced (hotels, guest houses and B&Bs), non-serviced (camping / self-catering) and with friends and friends.
- FOOD & DRINK; the headline expenditure pot comprises spend by both day visitors and staying visitors. However, this type of expenditure is not solely directed to convenience shops and also covers visits to eating and drinking establishments. The following split in the respective food & drink expenditure figures for day and staying visitors has therefore been applied to accurately quantify the amount of spend directed to convenience shops:
  - Day Visitors; the amount of food & drink expenditure spent in convenience shops and eating and drinking establishments within the town has been split on an 12.5% / 87.5% basis to reflect the findings of the Great Britain Day Visitor Survey which identifies that the larger proportion of expenditure is spent in eating and drinking establishments.
  - Staying Visitors; given the availability of non-serviced accommodation (e.g. self-catering) in the locality, the amount of food & drink expenditure spent in convenience shops and eating and drinking establishments within the town has been split on a higher 19% / 81% basis; this is based on STEAM advice with reference to the Great Britain Tourist Survey.
- **SHOPPING**; STEAM confirm that there is no overarching definition of this expenditure category (e.g. convenience or non-food comparison). It is however acknowledged that the majority of this expenditure relates to non-food and 'specialist' shopping given the questionnaire template adopted to inform the STEAM economic impact report.
- 2.27 With respect to the quantum of 'shopping' expenditure likely to be directed to convenience provision within Buxton, GVA adjudge that 5% of the overall shopping expenditure figure is appropriate given that:

- There is an extremely limited non-serviced accommodation offer within Buxton; the main visitor types are day visitors or those staying within serviced accommodation. Therefore, given that the food & drink expenditure spent by day visitors has already been established, the associated proportion of shopping expenditure within convenience stores is therefore likely to be a minor proportion as most visitors in serviced accommodation are likely to be partially or wholly catered for or will adopt the same spending patterns as day visitors in terms of predominantly eating out.
- The significant geographical extent (relative isolation) of the Buxton catchment and the relatively high drive-times from the town reduces the attractiveness and practicality of undertaking convenience based shopping (main food or top-up).
- There is no sufficient (regionally) distinction in the quality of the convenience offer within Buxton; it is predominantly characterised by national multiple retailers with few quality independents.
- 2.28 It is highly unlikely in GVA's view that visitors would dedicate any significant proportion of their visit or expenditure on convenience based shopping; the majority of shopping expenditure is in our view likely to be dedicated to non-food shopping.
- 2.29 Taking all of these definitions and assumptions into account, the impact of tourist inflow on the capacity need projections for Buxton is set out in the quantitative tables at Appendix 2c.

# 3. CAPACITY REVIEW

3.1 The revised quantitative capacity tables are set out in the attached appendices. However, for ease of reference, the updated figures (gross floorspace; post commitments and overtrading re-assignment) are set out below for comparative purposes.

3.2 As the table shows, aside from Buxton where a quantum of tourist inflow has been applied, there are limited changes in need requirements over the emerging plan period. The recently approved out-of-centre Aldi foodstore (1,589 m² gross; 1,140 m² net sales) at Chapel-en-le-Frith within the High Peak Central catchment further reduces the quantitative need arising over the emerging plan period. The implications of the updated assessment are fully considered in the following chapter.

3.3 Again as with convenience goods, there is minimal change in quantitative need aside from the Buxton (uplift arising from tourist inflow) and High Peak Central (finer grain analysis of likely (dissipated) trade draw of commitments such as Hog's Yard non-food retail units within the catchment).

# B) STRATEGIC IMPLICATIONS

3.4 On the basis of the updated population, expenditure, tourist inflow (Buxton only) and planning commitments, the recommended strategy is as follows:

# **HIGH PEAK**

- GLOSSOP; whilst there is additional expenditure growth identified over the emerging plan period, there is no change in respect of the 2013 Study recommended strategy.
   There remains no overriding quantitative or qualitative need for new convenience or comparison retail provision in the town.
- HIGH PEAK CENTRAL; the recent grant of planning permission for a new out-of-centre Aldi store in Chapel-en-le-Frith further reduces the quantitative capacity to support new provision in the catchment. However, there remains a 'location-specific' need for a new foodstore in New Mills to address the existing spatial deficiency in provision. Given existing commitments, there is no need for additional non-food retail.
- BUXTON (<u>CONVENIENCE</u>); whilst there is additional expenditure growth identified over
  the emerging plan period, including application of appropriate tourist inflow, there is
  no change in respect of the 2013 Study recommended strategy for either
  convenience or comparison goods.
  - Although the update study identifies additional quantitative capacity for convenience goods over the emerging plan period, it is GVA's view that the case for allocating a new sequentially preferable site to accommodate a new mainstream foodstore in the town remains marginal given:
  - The relative under-performance of convenience provision in the town centre (Waitrose at near benchmark, all other stores below).
  - The lack of qualitative need for new convenience provision given the breadth of provision in the town. There is no lack of choice or competition given the higher order provision (Waitrose and M&S), mainstream provision (Morrison's), discounters

(Aldi), frozen specialists (Iceland) as well as local independents and c-format stores catering for top-up needs (Co-Op, Tesco Express, Sainsbury's Local etc.).

- The reliance on diversion of all overtrading surplus from Aldi and also tourist inflow to generate more substantive quantitative capacity in the short to medium term phase of the emerging plan period (relative to the 2013 Study findings).
- There is no real scope for market share enhancement and therefore a new foodstore effectively reduces the existing quantum of expenditure available to support existing provision.

Whilst a new mainstream foodstore in closer proximity to the town centre may generate additional benefits such as encouraging more linked trips and increased activity, it remains GVA's view that there are no overriding grounds for the Council to allocate a new site over the early to mid-phase of the emerging plan.

• BUXTON (COMPARISON); the application of a significant quantum of tourist (inflow) expenditure has generated a significant increase in quantitative need identified over the emerging plan period. It is likely given the existing provision in the town that a significant quantum of this inflow expenditure is directed towards specialist shopping rather than mainstream comparison provision. Therefore, despite this overall uplift in available expenditure, it remains our view that there is no overriding need for the Council to proactively plan for new comparison retail floorspace in the town over the short to mid-term phase of the emerging plan period.

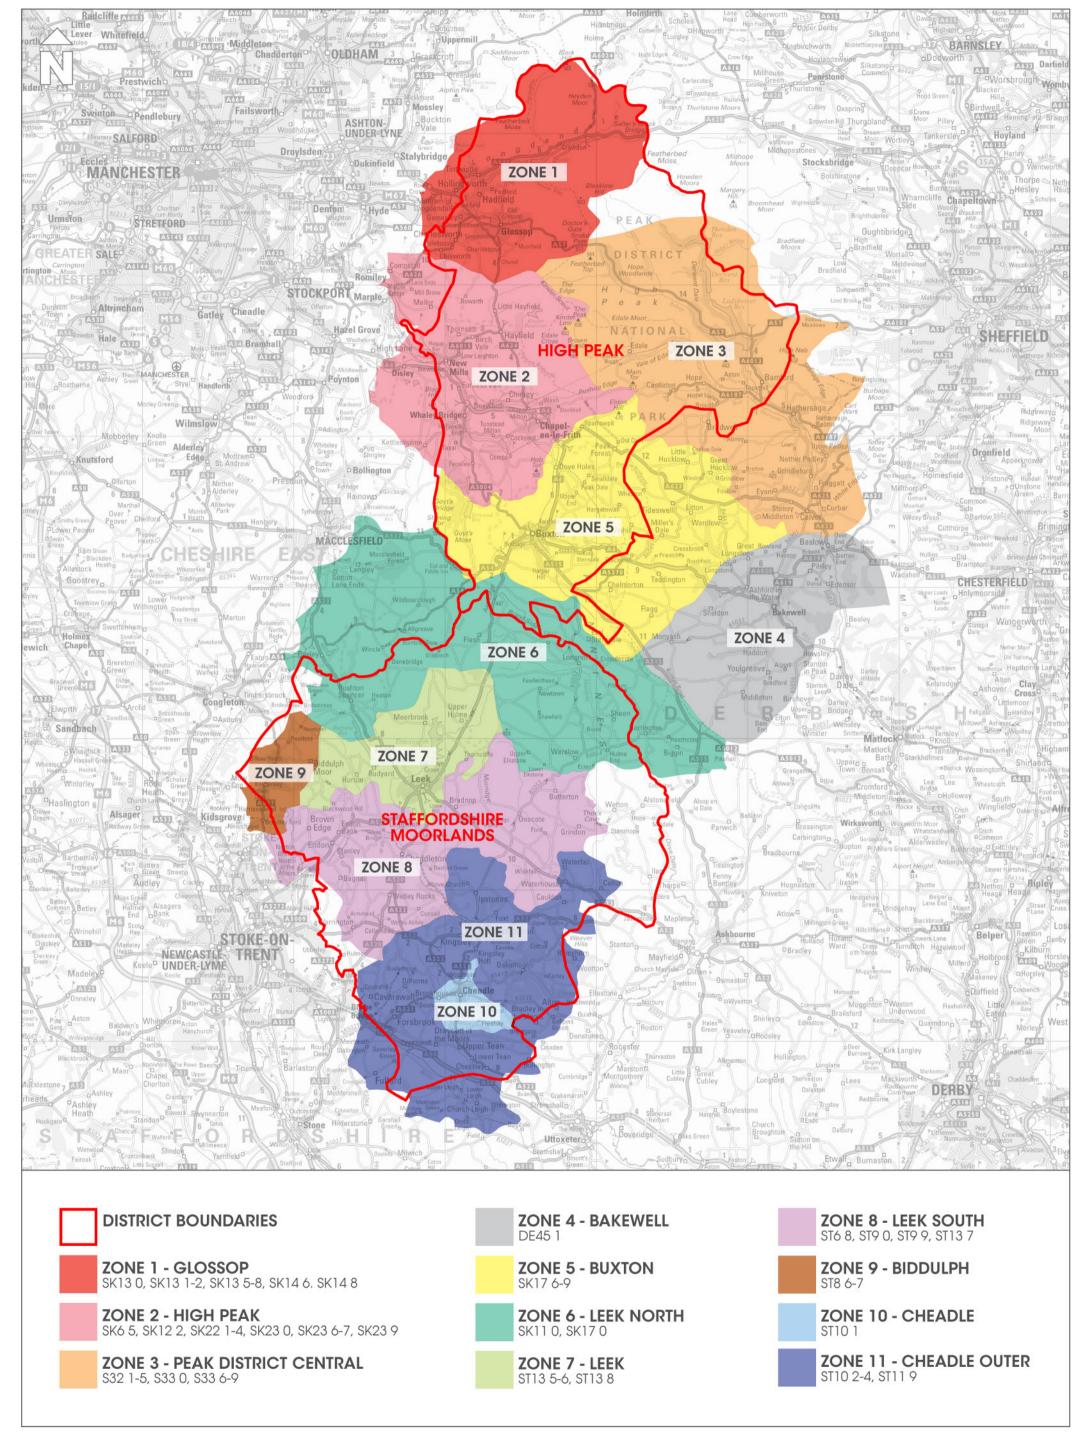

# STAFFS MOORLANDS

- **BIDDULPH**; there remains no change to the 2013 Study recommendations.
- **LEEK**; there remains no change to the 2013 Study recommendations.
- **CHEADLE**; there remains no change to the 2013 Study recommendations.
- 3.5 Ultimately, the study exercise is a 'point in time' assessment and the respective Council's should endeavour to update their respective evidence bases at appropriate times through the emerging plan period (to 2031).

# PLANNING FOR NEW LOCAL / NEIGHBOURHOOD CENTRES

3.6 Following the advent of NPPF there is no formal definition of what comprises a 'local centre' within national policy; the only definition of what comprises a 'local centre' is provided in the now cancelled PPS4 guidance (Annex B), as follows:

- 'a range of small shops of a local nature, serving a small catchment. Typically a local centre might include, amongst other shops, a small supermarket, a newsagent, a sub-post office and a pharmacy. Other facilities could include a takeaway and a laundrette'.
- 3.7 In order to ensure that future proposed new local centres associated with large strategic residential sites predominantly serve local needs and do not function as retail destinations which could compete with existing provision in defined town centres, it is important that:
  - The potential quantitative needs likely to be generated by proposed new residential provision are established; and
  - An appropriate policy framework is constructed so as to ensure that new provision solely serves local needs.
- 3.8 The expenditure capacity arising from a planned strategic housing site allocation can be established by calculating the resident population (based on average household size) and applying an appropriate expenditure (per capita) figure. It is however difficult to quantify the need for (Class A1) retail service uses (hairdressers, dry cleaners etc.), Class A2 premises (bookmakers, banks etc.), Class A3 / A5 outlets (i.e. takeaway outlet) and possibly a doctor's surgery and dentist (depending on PCT requirements).
- 3.9 Therefore, it is recommended that the Council should consider the following when constructing future site-specific policies for new local centres as part of new large / strategic residential developments:
  - Convenience Floorspace; the maximum Class A1 convenience floorspace within the scheme should be specified.
  - Range of Uses; the range of uses (Classes A1 A5, D1 etc.) which would create a
    viable local centre offer should be set out.
  - Maximum Unit Size; the maximum floorspace (square metres gross) size for an individual unit should be specified so as to ensure that large units are not created.
  - Phasing: policy should set out the quantum of residential development which should be constructed prior to commencement of trading so as to ensure that the local centre does not come forward in advance of the residential it is intended to serve.
- 3.10 The headline policy framework would enable the Council to control the nature of local centre provision that comes forward whilst enabling a viable scheme to emerge and respond to commercial market interest.

- 2. Expenditure projected forward as per Table 2 Expenditure per Capita (Experian Retail Planner 11)
- 3. STEAM defines Day Visitors as those visiting from a home location of not less than 3 hours outside normal resident address; those by persons residing within the district making day visits within that district and leisure day visits by those staying for a minimum of three hours without spending the night away from normal residence
- 4. Proportion of Convenience Expenditure sourced from STEAM report authors and is based on Great Britain Day Visitor Survey which details that 87.5% of food & drink expenditure is directed to Class A3 - A5 'Eating and Drinking' Establishments with 12.5% to shops and takeaways. The latter convenience proportion therefore adopted to quantify expenditure spend within stores.
