

# A6 Fairfield Roundabout Project- local community hub support...

Having established contact with The Residents of Fairfield Association during the project, our relationship has gone from strength to strength.

We have provided our help and support with some ROFA initiatives aimed at improving the lives of the local community. During our time constructing the new roundabout we provided a fruit tree orchard for the local children to enjoy and a cash donation for the recent Christmas appeal.

We were delighted to be invited along to the opening of the new ROFA community hub to meet the residents and listen to how the community is pulling together. The new challenge ahead is the cost of living crisis where many people are having to make the choice between “eat or heat”.

ROFA has been at the heart of the Fairfield community for over 25 years and by constantly evolving to meet the needs of their local community have remained relevant and needed. Through their new hub, they will be able to provide a warm and safe place which many local residents need at the moment.

We have provided a supply of tea, coffee hot chocolate and sugar for the months ahead. We also donated a defibrillator that we hope will not be needed, but is there for the community to use in the event of an emergency.

ROFA

*Rofa is delighted that you came to our opening. Great advice from Dave about the fruit trees you planted for us and an amazing surprise in the gift of a defibrillator for our office. How fantastic is that. Thank you for being a construction company that gets involved with the local community not rides roughshod over their needs. Thank you once again..*
